

## Operations Lead. A-FOD: “Artificial Intelligence for Safer and Efficient Flights”

At ArgosAI (<https://www.argosai.com/>), we aim to make flights safer and more efficient by automation of airside operations in airports with ‘Artificial Intelligence’ applications

**A-FOD**, flagship product of ArgosAI, is a complete Runway and Apron management system and has been used and operated by the biggest airports in the world.

We are looking for top-talent and ambitious engineers to work with us at our METU Technopark (ODTÜ) office in Ankara and lead our operations in airports around the world.

### What you need for this position;

- BS Engineering degree
- Strong knowledge and/or experience in operations planning
- Strong communication and interpersonal skills and related past experience.
- Must have at least one of the following:
  - Strong experience in project management of site/customer installation projects (e.g. IT, data room, CCTV, machine vision systems) and/or engineering organization, resource, scope, schedule planning
  - PMI/PMP certification
- Strong experience in at least one of the following:
  - IT - Network infrastructure design and/or installation
  - Camera, sensor, pan-tilt unit, IR illuminator selection and/or installation
  - Systems engineering, quality assurance, camera calibration, customer tests
- Good to have knowledge and experience in customer relations-accountant responsibility, supply management, cyber-data-IT security, electro-optic design, assembly design, linux operating systems, mechanical-industrial design, cloud applications, and commissioning.

### What you will be doing;

- Plan, lead and execute all on-site operations
- The design, deployment, tests and commissioning, after sales maintenance and support, standardization, quality assurance activities of A-FOD applications in airports around the world.
- Support the operational and technical aspects of bidding, business development and marketing documentation activities.
- Plan and execute the project management activities for the installation of A-FOD in airports in the world, ensuring milestones are reached, budget and cash flow is managed, schedule works, submittals are delivered, requirements are complied and product is delivered.(Note: in short term -8 months- you will be supporting the A-FOD project management team and gaining hands-on experience to manage the installation of A-FOD in airports.)

### Job Type;

Full time

### Company Location;

ODTU Teknokent
